	W3	W4	W1	W2	W3	W4	W1	W2	W3	W4	W1	W2	W3	W4	W1	W2	W3	W4
T1.1.1: Design User Interface - Finalise layout and design																		
T2.1.1: Setup and Configure Client/Server using MQTT - Client/Server setup																		
T2.1.2: Setup and Configure Client/Server using MQTT - Multiple Clients																		
D1: Project Plan				17														
T2.2.1: Setup and Configure Client/Server using MQTT - Message Exchange																		
T2.2.2: Setup and Configure Client/Server using MQTT - Chat Room Creation																		
M1.1: Test MQTT function implementation T1/T2.1/T2.2																		
T2.3.1: Setup and Configure Client/Server using MQTT - Message speed																		
T2.4.1: Setup and Configure Client/Server using MQTT - Conversation history																		
M1.2: Test MQTT function implementation T2.3/T2.4																		
T3.3.1: Create separate user classes - Chat Room Creation																		
T3.1.1: Create separate user classes - Admin role and permission allocation																		
T3.1.2: Create separate user classes - Admin role (Promote and demote users)																		
T3.2.1: Create separate user classes - Moderator permission inheritance																		
T3.2.2: Create separate user classes - Moderator (Invite and remove users)																		
T3.2.3: Create separate user classes - Moderator (Create and delete channels)																		
T3.2.4: Create separate user classes - Moderator (Delete user messages)																		
M2: Test User classes																		
D2: Project Design							7	•										
T4.1.1: Implement User Interface - Message Exchange																		
T4.1.2: Implement User Interface - User contacts pane																		
T4.2.1: Implement User Interface - Display user profile picture																		
T7.1.1: Develop user profile and control panel - User status																		
T7.2.1: Develop user profile and control panel - User profile picture																		
T7.2.2: Develop user profile and control panel - Display user profile picture																		
M3.2: Test User interface implementation T4.1.X/T4.2.X																		
T4.3.1: Implement User Interface - Light and Dark mode																		
T4.3.2: Implement User Interface - Customise text size																		
T4.4.1: Implement User Interface - Language options																		
T7.3.1: Develop user profile and control panel - Light and Dark mode																		

T7.3.2: Develop user profile and control panel - Customise text size								
T7.4.1: Develop user profile and control panel - Language options								
D3: Reference Manual				28				
M3.2: Test User interface implementation T4.3.X/T4.4.X								
T6.1.1: Implement security features and protocols - Locally saved passwords								
T6.1.2: Implement security features and protocols - User space access								
T6.3.1: Implement security features and protocols - Log off user								
T6.1.3: Implement security features and protocols - Privacy Laws								
M4: Test Security implementation								
T5.1.1: Implement event listeners - Notification system								
M5: Test Event listeners								
T8.1.1: Implement file transfer feature - Exchange files with contacts								
T6.2.1: Implement security features and protocols - File transfer confirmation								
M6: Test File transfer features and security imlementation of file transfer								
T9.1.1: Setup a local database - Locally saved passwords								
T9.2.1: Setup a local database - Offline messages stored locally								
M7: Test implementation of database feactures								
D4: Test Plan						2	8	
T10.1.1: Consider the implementation of additional features - Receipts								
T10.2.1: Consider the implementation of additional features - Emojis								
T10.3.1: Consider the implementation of additional features - macOS version								
M8: Test implementation of additional features								
D5: Final Report								25
