T1.1.1: Design User Interface - Finalise layout and design																		
T2.1.1: Setup and Configure Client/Server using MQTT - Client/Server setup																		
T2.1.2: Setup and Configure Client/Server using MQTT - Multiple Clients																		
D1: Project Plan				17														
T2.2.1: Setup and Configure Client/Server using MQTT - Message Exchange																		
T2.2.2: Setup and Configure Client/Server using MQTT - Chat Room Creation																		
M1.1: Test MQTT function implementation T1/T2.1/T2.2																		
T2.3.1: Setup and Configure Client/Server using MQTT - Message speed																		
T2.4.1: Setup and Configure Client/Server using MQTT - Conversation history																		
M1.2: Test MQTT function implementation T2.3/T2.4																		
T3.3.1: Create separate user classes - Chat Room Creation																		
T3.1.1: Create separate user classes - Admin role and permission allocation																		
T3.1.2: Create separate user classes - Admin role (Promote and demote users)																		
T3.2.1: Create separate user classes - Moderator permission inheritance																		
T3.2.2: Create separate user classes - Moderator (Invite and remove users)																		
T3.2.3: Create separate user classes - Moderator (Create and delete channels)																		
T3.2.4: Create separate user classes - Moderator (Delete user messages)																		
M2: Test User classes																		
D2: Project Design							7	•										
T4.1.1: Implement User Interface - Message Exchange																		
T4.1.2: Implement User Interface - User contacts pane																		
T4.2.1: Implement User Interface - Display user profile picture																		
T7.1.1: Develop user profile and control panel - User status																		
T7.2.1: Develop user profile and control panel - User profile picture																		
T7.2.2: Develop user profile and control panel - Display user profile picture																		
M3.2: Test User interface implementation T4.1.X/T4.2.X																		
T4.3.1: Implement User Interface - Light and Dark mode																		
T4.3.2: Implement User Interface - Customise text size																		
T4.4.1: Implement User Interface - Language options																		
T7.3.1: Develop user profile and control panel - Light and Dark mode																		

T7.3.1: Develop user profile and control panel - Customise text size T7.4.1: Develop user profile and control panel - Language options D3: Reference Manual M3.2: Test User interface implementation T4.3.X/T4.4.X T6.1.1: Implement security features and protocols - Losely saved passwords T6.1.2: Implement security features and protocols - User space access T6.3.1: Implement security features and protocols - User space access T6.1.3: Implement security features and protocols - Privacy Laws M4: Test Security implementation T5.1.1: Implement security features and protocols - Privacy Laws M5: Test Eventh listeners - Notification system M6: Test Eventh listeners - Notification system M75.1.1: Implement file transfer feature - Exchange files with contacts T6.2.1: Implement security features and protocols - File transfer confirmation M6: Test File transfer feature - Exchange files with contacts T6.2.1: Implement security features and protocols - File transfer confirmation M6: Test File transfer features and security immementation of file transfer T9.1.1: Setup a local database - Locally saved passwords T9.2.1: Setup a local database - Locally saved passwords T9.2.1: Setup a local database - Locally saved passwords T9.2.1: Setup a local database - Offline messages stored locally T7. Test implementation of database features D6: Test Plan T1.1.1: Consider the implementation of additional features - Receipts T1.0.1: Consider the implementation of additional features - Emojis T1.0.3: Consider the implementation of additional features - Emojis T1.0.3: Consider the implementation of additional features - macOS version M8: Test implementation of additional features - macOS version M8: Test implementation of additional features - M6: Version M8: Test implementation of additional features - M7: Version M8: Test implementation of additional features - M7: Version M8: Test implementation of additional features - M7: Version M8: Version M8											
D3: Reference Manual  M3.2: Test User interface implementation T4.3.X/T4.4.X  T6.1.1: Implement security features and protocols - Locally saved passwords  T6.1.2: Implement security features and protocols - User space access  T6.3.1: Implement security features and protocols - User space access  T6.3.1: Implement security features and protocols - Privacy Laws  M4: Test Security implementation  T5.1.1: Implement event listeners - Notification system  M5: Test Event listeners  T8.1.1: Implement file transfer feature - Exchange files with contacts  T6.2.1: Implement security features and protocols - File transfer confirmation  M6: Test File transfer features and security imlementation of file transfer  T9.1.1: Setup a local database - Locally saved passwords  T9.2.1: Setup a local database - Offline messages stored locally  M7: Test implementation of database feactures  D4: Test Plan  T10.1.1: Consider the implementation of additional features - Receipts  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features - macOS version  M8: Test implementation of additional features	T7.3.2: Develop user profile and control panel - Customise text size										
M3.2: Test User interface implementation T4.3.X/T4.4.X  T6.1.1: Implement security features and protocols - Locally saved passwords T6.1.2: Implement security features and protocols - User space access T6.3.1: Implement security features and protocols - Log off user T6.1.3: Implement security features and protocols - Privacy Laws M4: Test Security implementation T5.1.1: Implement event listeners - Notification system M5: Test Event listeners T8.1.1: Implement file transfer feature - Exchange files with contacts T6.2.1: Implement security features and protocols - File transfer confirmation M6: Test File transfer features and security imlementation of file transfer T9.1.1: Setup a local database - Locally saved passwords T9.2.1: Setup a local database - Offline messages stored locally M7: Test implementation of database feactures D4: Test Plan T10.1.1: Consider the implementation of additional features - Receipts T10.3.1: Consider the implementation of additional features - macOS version M8: Test implementation of additional features - macOS version M8: Test implementation of additional features	T7.4.1: Develop user profile and control panel - Language options										
T6.1.2: Implement security features and protocols - Locally saved passwords T6.1.2: Implement security features and protocols - User space access T6.3.1: Implement security features and protocols - Log off user T6.1.3: Implement security features and protocols - Privacy Laws M4: Test Security implementation T5.1.1: Implement event listeners - Notification system M5: Test Event listeners T8.1.1: Implement file transfer feature - Exchange files with contacts T6.2.1: Implement security features and protocols - File transfer confirmation M6: Test File transfer features and security imlementation of file transfer T9.1.1: Setup a local database - Locally saved passwords T9.2.1: Setup a local database - Offline messages stored locally M7: Test implementation of database feactures M6: Test Plan T10.1.1: Consider the implementation of additional features - Receipts T10.2.1: Consider the implementation of additional features - macOS version M8: Test implementation of additional features	D3: Reference Manual					28					
T6.1.2: Implement security features and protocols - User space access T6.3.1: Implement security features and protocols - Log off user T6.1.3: Implement security features and protocols - Privacy Laws M4: Test Security implementation T5.1.1: Implement event listeners - Notification system M5: Test Event listeners T8.1.1: Implement file transfer feature - Exchange files with contacts T8.1.1: Implement security features and protocols - File transfer confirmation M6: Test File transfer features and security imlementation of file transfer T9.1.1: Setup a local database - Locally saved passwords T9.2.1: Setup a local database - Offline messages stored locally M7: Test implementation of database feactures D4: Test implementation of additional features - Receipts T10.2.1: Consider the implementation of additional features - Emojis T10.3.1: Consider the implementation of additional features - macOS version M8: Test implementation of additional features	M3.2: Test User interface implementation T4.3.X/T4.4.X										
T6.3.1: Implement security features and protocols - Log off user  T6.1.3: Implement security features and protocols - Privacy Laws  M4: Test Security implementation  T5.1.1: Implement event listeners - Notification system  M5: Test Event listeners  T8.1.1: Implement file transfer feature - Exchange files with contacts  T6.2.1: Implement security features and protocols - File transfer confirmation  M6: Test File transfer features and security imlementation of file transfer  T9.1.1: Setup a local database - Locally saved passwords  T9.2.1: Setup a local database - Offline messages stored locally  M7: Test implementation of database feactures  D4: Test Plan  T10.1.1: Consider the implementation of additional features - Receipts  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	T6.1.1: Implement security features and protocols - Locally saved passwords										
T6.1.3: Implement security features and protocols - Privacy Laws  M4: Test Security implementation  T5.1.1: Implement event listeners - Notification system  M5: Test Event listeners  T8.1.1: Implement file transfer feature - Exchange files with contacts  T6.2.1: Implement security features and protocols - File transfer confirmation  M6: Test File transfer features and security imlementation of file transfer  T9.1.1: Setup a local database - Locally saved passwords  T9.2.1: Setup a local database - Offline messages stored locally  M7: Test implementation of database feactures  D4: Test Plan  T10.1.1: Consider the implementation of additional features - Receipts  T10.2.1: Consider the implementation of additional features - Emojis  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	T6.1.2: Implement security features and protocols - User space access										
M4: Test Security implementation T5.1.1: Implement event listeners - Notification system M5: Test Event listeners T8.1.1: Implement file transfer feature - Exchange files with contacts T6.2.1: Implement security features and protocols - File transfer confirmation M6: Test File transfer features and security imlementation of file transfer T9.1.1: Setup a local database - Locally saved passwords T9.2.1: Setup a local database - Offline messages stored locally M7: Test implementation of database feactures D4: Test Plan T10.1.1: Consider the implementation of additional features - Receipts T10.2.1: Consider the implementation of additional features - Emojis T10.3.1: Consider the implementation of additional features - macOS version M8: Test implementation of additional features	T6.3.1: Implement security features and protocols - Log off user										
T5.1.1: Implement event listeners  M5: Test Event listeners  T8.1.1: Implement file transfer feature - Exchange files with contacts  T6.2.1: Implement security features and protocols - File transfer confirmation  M6: Test File transfer features and security imlementation of file transfer  T9.1.1: Setup a local database - Locally saved passwords  T9.2.1: Setup a local database - Offline messages stored locally  M7: Test implementation of database feactures  D4: Test Plan  28  T10.1.1: Consider the implementation of additional features - Receipts  T10.2.1: Consider the implementation of additional features - Emojis  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	T6.1.3: Implement security features and protocols - Privacy Laws										
M5: Test Event listeners  T8.1.1: Implement file transfer feature - Exchange files with contacts  T6.2.1: Implement security features and protocols - File transfer confirmation  M6: Test File transfer features and security imlementation of file transfer  T9.1.1: Setup a local database - Locally saved passwords  T9.2.1: Setup a local database - Offline messages stored locally  M7: Test implementation of database feactures  D4: Test Plan  T10.1.1: Consider the implementation of additional features - Receipts  T10.2.1: Consider the implementation of additional features - Emojis  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	M4: Test Security implementation										
T8.1.1: Implement file transfer feature - Exchange files with contacts  T6.2.1: Implement security features and protocols - File transfer confirmation  M6: Test File transfer features and security imlementation of file transfer  T9.1.1: Setup a local database - Locally saved passwords  T9.2.1: Setup a local database - Offline messages stored locally  M7: Test implementation of database feactures  D4: Test Plan  T10.1.1: Consider the implementation of additional features - Receipts  T10.2.1: Consider the implementation of additional features - Emojis  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	T5.1.1: Implement event listeners - Notification system										
T6.2.1: Implement security features and protocols - File transfer confirmation  M6: Test File transfer features and security imlementation of file transfer  T9.1.1: Setup a local database - Locally saved passwords  T9.2.1: Setup a local database - Offline messages stored locally  M7: Test implementation of database feactures  D4: Test Plan  T10.1.1: Consider the implementation of additional features - Receipts  T10.2.1: Consider the implementation of additional features - Emojis  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	M5: Test Event listeners										
M6: Test File transfer features and security imlementation of file transfer  T9.1.1: Setup a local database - Locally saved passwords  T9.2.1: Setup a local database - Offline messages stored locally  M7: Test implementation of database feactures  D4: Test Plan  T10.1.1: Consider the implementation of additional features - Receipts  T10.2.1: Consider the implementation of additional features - Emojis  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	T8.1.1: Implement file transfer feature - Exchange files with contacts										
T9.1.1: Setup a local database - Locally saved passwords T9.2.1: Setup a local database - Offline messages stored locally M7: Test implementation of database feactures D4: Test Plan T10.1.1: Consider the implementation of additional features - Receipts T10.2.1: Consider the implementation of additional features - Emojis T10.3.1: Consider the implementation of additional features - macOS version M8: Test implementation of additional features	T6.2.1: Implement security features and protocols - File transfer confirmation										
T9.2.1: Setup a local database - Offline messages stored locally  M7: Test implementation of database feactures  D4: Test Plan  T10.1.1: Consider the implementation of additional features - Receipts  T10.2.1: Consider the implementation of additional features - Emojis  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	M6: Test File transfer features and security imlementation of file transfer										
M7: Test implementation of database feactures  D4: Test Plan  T10.1.1: Consider the implementation of additional features - Receipts  T10.2.1: Consider the implementation of additional features - Emojis  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	T9.1.1: Setup a local database - Locally saved passwords										
D4: Test Plan  T10.1.1: Consider the implementation of additional features - Receipts  T10.2.1: Consider the implementation of additional features - Emojis  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	T9.2.1: Setup a local database - Offline messages stored locally										
T10.1.1: Consider the implementation of additional features - Receipts  T10.2.1: Consider the implementation of additional features - Emojis  T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	M7: Test implementation of database feactures										
T10.2.1: Consider the implementation of additional features - Emojis T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	D4: Test Plan							28			
T10.3.1: Consider the implementation of additional features - macOS version  M8: Test implementation of additional features	T10.1.1: Consider the implementation of additional features - Receipts										
M8: Test implementation of additional features	T10.2.1: Consider the implementation of additional features - Emojis										
	T10.3.1: Consider the implementation of additional features - macOS version										
D5: Final Report  D6: Final Report  D7: Final Re	M8: Test implementation of additional features										
	D5: Final Report									25
